

SIGNAL FLAGS COLORING BOOK

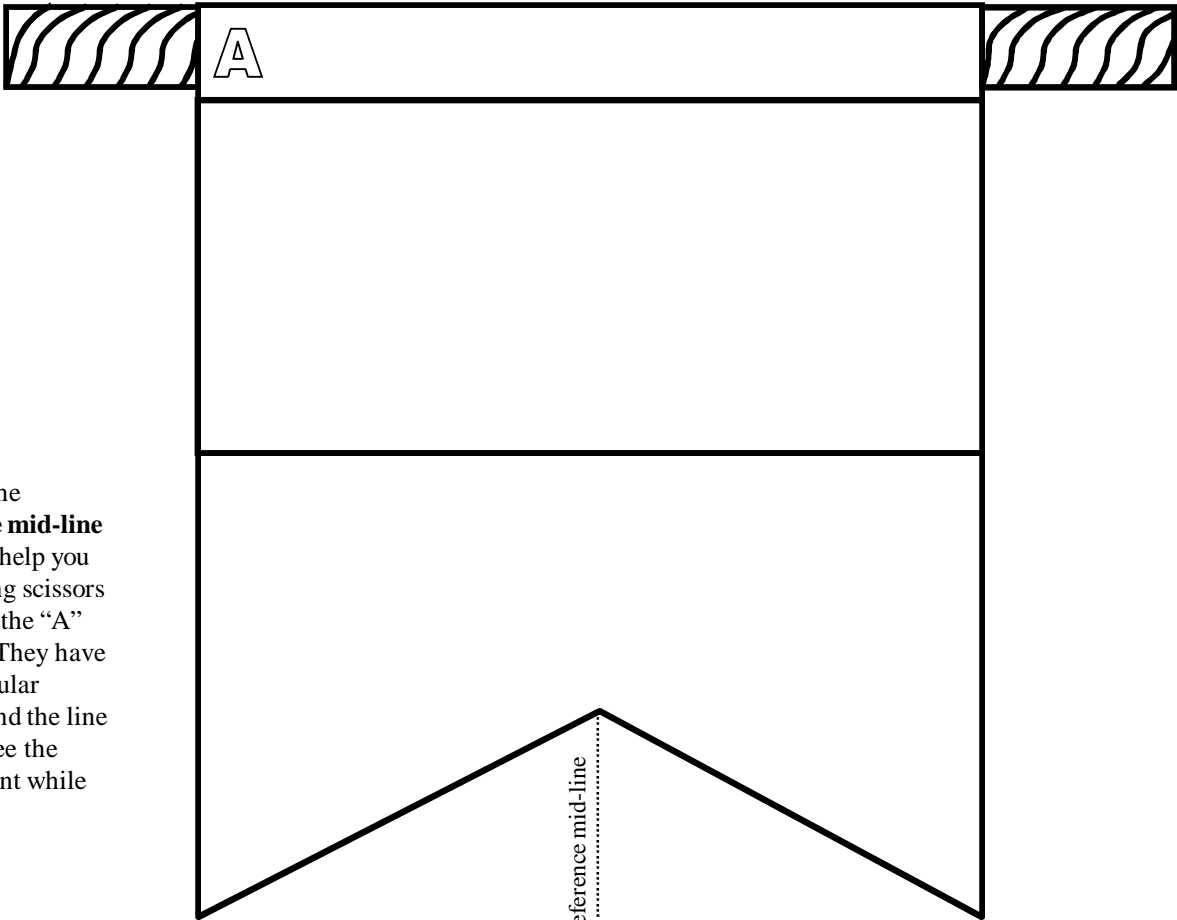

Helpful Hints

Signal flags use 5 colors. However:

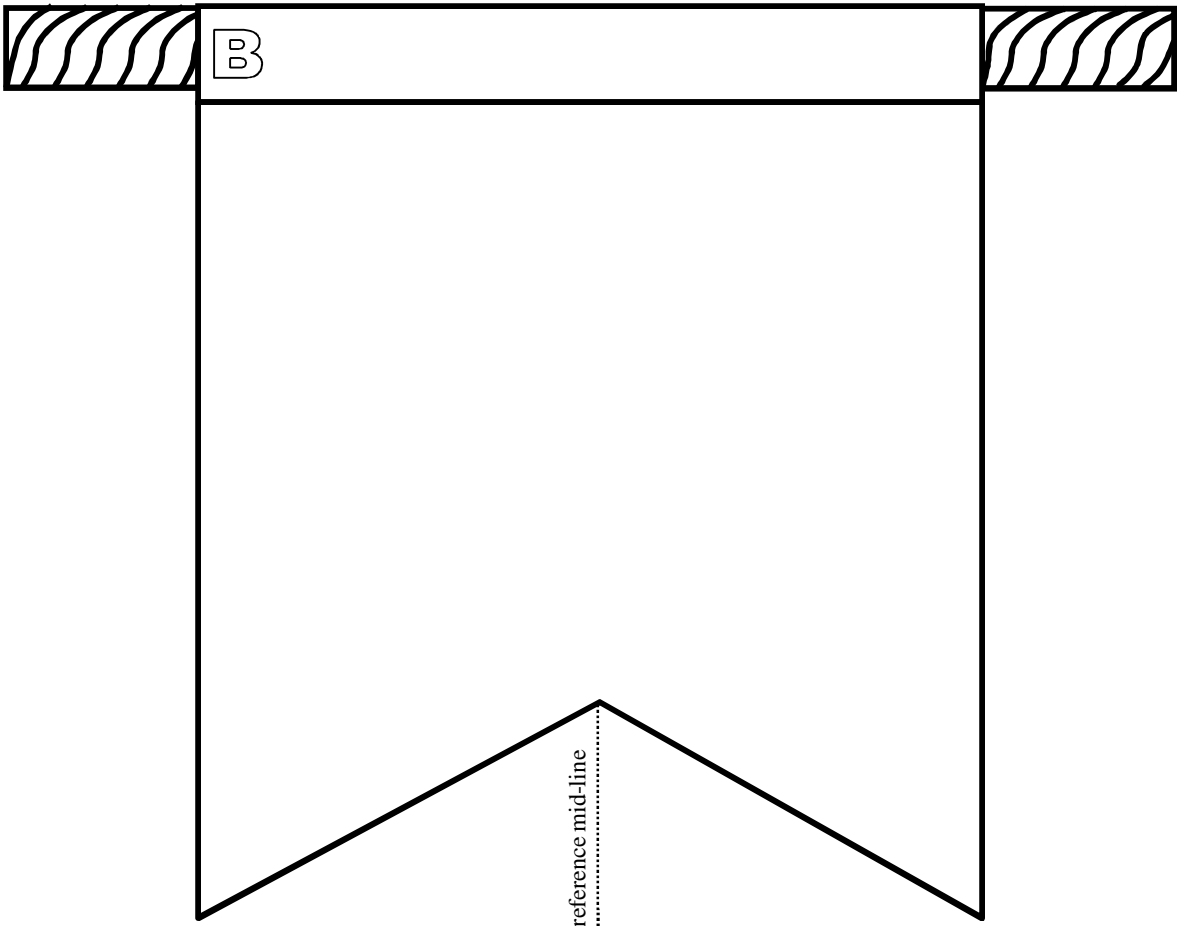

- Only 4 colors are needed to color these signal flags. The WHITE color can be the paper itself.
 - RED
 - BLUE
 - YELLOW
 - BLACK
- Each flag has a small color picture at the far left of how the flag to its right should look.
- We recommend printing this document in color in order to see how each flag should be colored.
- You can cut out each flag, along with the “rope” tabs at the top on either side of the white casing. (Note: This activity isn’t recommended for very young children. Older siblings or parents should do the cutting.)
 - Lay the tabs on top of each other, then use transparent tape to stick them together in a line (like paper dolls).

Lines of paper flag banners can be taped together and put up on a refrigerator, bulletin board and so forth.

To make more than 1 of a letter, print the page with that letter again. For example, to spell “BOBBY,” print 3 copies of the page with A and B on it.

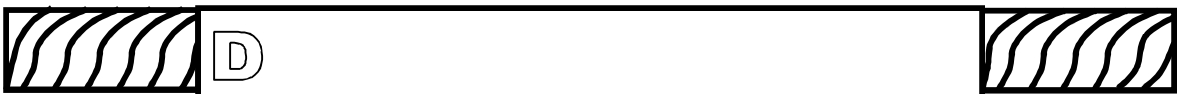

NOTE: The **reference mid-line** is only to help you when using scissors to cut out the "A" and "B." They have the triangular bottom, and the line helps to see the center point while cutting.
